PROFESSIONAL TIP:

The smallest acts of kindness and care mean so much to NICU families. As a parent who spent 4 months in the NICU and lost one child (at two months) I will forever remember the little moments that made our experience better. From taking pictures of our babies to making signs for their big milestones, these kind gestures go a long way.

Years Helping Premies:

3

Focus:

Providing comfort to NICU families through delivering new children's books for bedside reading.

Website:

www.tripleheartfoundation.com

Inspiration for the Charity:

The organization was created to honor their triplets born in 2013 at 22 weeks and 6 days. Abby passed away shortly after birth; Parker at two months old. It was a NICU nurse who mentioned the benefits of reading to the babies. Those were the seeds of the organization.

ADVOCATE: World Braille Day

January 4th, 2017 is World Braille Day due to it being the birthday of Louis Braille who invented this code in 1821. In our community of preemie parents we have many families affected by blindness due to **Retinopathy of Prematurity (ROP)**. Braille is used worldwide. To learn more about the individual behind it, go here to find out more: <http://bit.ly/BrailleDay>

PREEMIE FREEBIE: VIPreemie (VIP) Badges

PremieWorld provides a number of free handouts to be used in the NICU and beyond in its "[Freebies](#)" section of the website.

This month's freebies are **VIPreemie (VIP) Badges**. "Parents and grandparents are so stressed that the baby is in the NICU that the celebration tends to go by the wayside," comments **Deb Discenza, Founder of PremieWorld**. "Our

VIPreemie badges give them a simple chance to show off their preemie pride to the world." :-)

TOOLS AND RESOURCES FOR THE PREEMIE COMMUNITY

SUPPORT:

Will's Way Foundation

WILL'S WAY FOUNDATION

After the premature birth of their son Will and during his 5-month stay in the NICU, Scott Bolick and Brittany Lothe saw firsthand the challenges that come with having a sick child in the hospital. Their foundation seeks to change that.

Established: 2014

Outreach: Northern California

Web: www.willswayfoundation.us

Programs: Providing crucial and effective support to low-income families through support grants and research. To date the organization has provided over 700 support grants including meals, transportation and lodging. And now they are partnering with UCSF on a research project to advance family integrated care in the U.S.

ORGANIZATION:

Triple Heart Foundation

Ryan and Stacey Skrysak created **Triple Heart Foundation** in honor of their premature triplets - **Peyton, Parker and Abby** who were born in 2013 at 22 weeks and 6 days. With the death of two of the triplets, their daughter Peyton survived and is today a happy and healthy 3-year old. During the NICU stay a nurse suggested the helpless parents read to their children. Those were the early seeds of **The Triple Heart Foundation**.

Established: 2016

Reach: Regional Illinois/National

Website: www.tripleheartfoundation.com

Programs:

The organization donates new children's books to NICU families. But with a recent grant the organization is now developing care packages that include books, handmade crochet hats and blankets by volunteers. The organization is seeking extra volunteers to meet the demand. Contact them at the website for more information.

Need a Care Package? Contact the organization at their website via the "Contact Us" form.

PREEMIE GENIUS:

RES-Q Wedge

by CR Enterprises, LLC
www.ResQWedge.com

If there is one thing most preemie parents “get” is acid reflux. Reflux wreaks havoc with feeding, with sleeping, with growth and especially with that all-important “tummy-time” and “head-molding” requirement for development. Enter the ResQWedge to the rescue!

The ResQWedge is a medical device used by NICUs and rehab facilities to provide a 35-45 degree angle for supine resting and 30-degree angle for prone positioning. It is now available for sale to patient families directly. A solid, well-made product, the ResQWedge’s genius is in its quality and its simplicity to keep the baby up at a safe and appropriate angle for relief and continued progress

AFTER THE NICU:

When it is Time to Change Doctors

Not every doctor is going to be a perfect fit for your child. Start the new year off assessing how your post-NICU team (pediatrician, specialists, therapists) is helping or hindering your child, such as:

- The professional is not well-versed in prematurity and its short-term and long-term effects.
- The professional seems to brush off your ongoing concerns about your child.
- The professional is not considering other ideas in terms of treatment, despite being shown credible literature.
- The professional is not a good personality fit with what you need.

SHARE YOUR TIPS:

Have you had to change doctors post-NICU? Tell us about it using the hash tag [#preemiedocs](https://twitter.com/preemiedocs)
